### Urbanization and Conservation — Hand in Glove Green Urbanization Cities Rooted in Nature

Green spaces in cities serve as places of relaxation and recreation. Their advantages include fresh air, ~~temperature drop~~, and positive health outcomes. However, striking a balance between ~~expanding cities~~ <sup>rapid urbanization</sup> and nature preservation is ~~challenging~~. To achieve ~~that~~, it is mandatory to make a shift to ~~sustainable~~ development. Steps involving plantation of trees and introduction of parks are vital to improving human and environmental health. It calls for a concerted effort to create harmony between human development and environmental preservation.

main idea is picked but there is no coherence in the p
