6- Conclusion

Date: _____

Human life without technology is like birds without feathers. Surviving in today's world without technology is unimaginable. The Corona Virus pandemic has moreover proven the importance of technology in our daily life. Technology is integrated in people's life from processed use of internet in education facilities to rise in digital currency and online banking. Moreover daily life tasks has been solved due to advancement in gadgets used in house chores. Politicians use technology along with social media for their election campaigns. This generation stay updated through social media. Additionally people use technology for navigation in daily life. Rise in remote jobs has been seen due to technology. In spite of all these blessings technology has its own dark side from making education worse to digital amnesia. Overuse of technology is making education worse. Furthermore there is rise in cyberbullying and digital propaganda. Lastly excessive use of technology is taking a toll on human mental health i.e. behavioral disorders due to gaming addiction and mental health breakdown i.e. depression and rest.

However a balance can be created by inclusion of technology free parks, digital detox days and reducing excessive screen time on smartphone with other activities. Technology has become integral part of human's daily life. However, the overdependency on technology has negative consequences on human's life and health which can be limited or controlled by limiting the use of technology.

People have become overly dependent on technology in their daily life. As a report by the Pew Research Center suggests that 81% of the Americans own a smartphone. A widespread reliance on these devices for communication, information access and entertainment. Living without technology is like living without air. Technology is deeply rooted and integrated in human's life. From small tasks of house like laundry, dishwashing, vacuum cleaning of house to bigger tasks like election campaigns, providing services in 5-star hotels and banks all goes through advanced technology. Other than that technology is used for educational purpose, for entertainment, for raising awareness about social taboo's, and lastly for getting entertainment. A

Date: _____
