~~VJ- Conclusion.~~

Prosperity of ~~Pakistan~~ is ~~dependent~~ on different factors. For this, political ~~Stabalization~~ need it to ensure the good democratic environment.

Local persons ~~join~~ the politics to represent the area, to remove the feudalism culture in ~~Pakistan~~.

Crood economy indicates the state is in right direction. Pakistan has importance due to geostrategic location. This is the reason behind China and Pakistan, working on CPEC, this economic corridor is the pathway to trade with internationally in easiest way, and get the taxes from different countries by providing the services. Pakistan need to improve infrastructure, and ensure the security of business in that areas. Improve the quality of education, and health services, specially in tribal areas.

And one is the most big challenge for Pakistan is Climate Change, and water crises. Because both issues create the food crises, and both are essential for the survival and Prosperity of Pakistan.

In short, if Pakistan face the crises effectively and get the advantages for geostrategic location, and improve the local structure, it can run on the track of prosperity
