OUTLINE

I Introduction

- Hook
- General Statements
- Thesis Statement

plz take each paragraph serious and complete in itself

II How An Investment in Knowledge pays the Best Interest?

plz improvise the first word ..do replace first verb

- ~~Helps~~ in ~~creating~~ a ~~per~~ better person in the society
- ~~Helps~~ in making informed decisions and ~~calculated~~ risk decisions
- ~~Makes~~ a great politician by prioritising public interest
- ~~Makes~~ a great economist who can devise a robust economic policies.
- Shapes a good technocrat with practical life experience
- Knowledgeable person makes society great by taking care of others and environment.

7. helps in integrating the economies.
8. Eliminates the social evils.
9. Changes the destiny of the countries.
10. Enhances the productivity in the countries.

III Conclusion

— xxx —

"Acquire knowledge from cradle to grave." Holy ^{the} Prophet Hazrat Muhammed S.A.W.W. His statement highlights the significance of getting knowledge in the individual life. Education plays a pivotal role in the person's life, change its destiny and make a educated person human being in the society. Investment in knowledge in form of resource, time and effort pays the best interest not only for individual itself but it also contributes greatly in the country. Knowledge helps in differentiating between right and wrong. A country inundated with illiterate people never succeeded to rise and compete in the world as they lack the direction which comes from acquiring education. Knowledge can be acquired in any field but contemporary education is compulsory. It is because countries at higher levels and individuals at lower levels are extremely

~~get~~ dependent and interlinked. No one can survive in isolation.
 Due to ^{Therefore} ~~which~~, this essay will discuss about how
 an investment in knowledge pays the best interest in the
 different strata of society: ~~creating~~ ^a better person,
 helping in informed decisions, shaping a good politician,
 economist, leader, technocrat, and ~~inculcating~~ responsibility
 of taking care of environment. ~~It also integrates the~~
~~economy~~, eliminates the social evils, ^{changes} ~~change~~ destiny
 of the country and enhances its productivity.

To begin with, an investment in knowledge pays
 the best interest by ^{better} creating a [↑] person in the society.
 Knowledgeable person ~~have~~ ^{understanding} knowledge of right and wrong.
~~He does enjoining what is right and forbidding what~~
~~is wrong.~~ He knows if he adopts wrong route, he will
 have to ~~face~~ ^{face} severe consequences by the law
 and enforcement agencies. Moreover, his self-consciousness
 does not allow him to do wrong. When a person
 is better in the society, he exerts positive externalities
 by ~~inculcating~~ ^{inspiring} good deeds to his fellow. Malala Yousafzai,
 who ~~she~~ put her life at risk, still choose to opt education.
 After surviving from heinous attacks and when she got bullets,
 she decided not to ~~step~~ ^{step} back. And eventually, she is
 residing in the USA and ^{received} ~~get~~ an ~~opportunities~~ opportunity
 to get education from top universities of the USA. This
 all was possible because her dedication towards knowledge
 paid her the best interest and in the society.

Secondly, an investment in knowledge ^{helps} ~~makes~~
 in making informed decisions and individuals can take

Date: _____

calculated risk decision. A person can ^{make} ~~easy~~ educated guesses and do cost-benefit analysis in their life. They do research and take decision ^{considering} with ~~had~~ the ramifications and advantages. By doing so, the risk is minimised to a certain controllable level instead of just taking decisions ^{blindly} ~~randomly~~. Knowledgeable person implement and analysis the strengths, weaknesses, opportunities and threat which is basically called SWOT Analysis. Even artificial ^{person} ~~entity~~ like companies also ~~get~~ do their SWOT Analysis before taking any ~~ex~~ decision. For example, before opening direct route to Tashkent, ^{Uzbekistan,} ~~Uzbekistan,~~ PIA would have surely ^{done} ~~do~~ SWOT Analysis, evaluating whether it will be profitable route or not. Thus, this SWOT Analysis and was possible because of an investment in knowledge that paid the best ~~best~~ interest for PIA.

Makes a great politician by prioritising public interest is the third reason of how an investment in knowledge to pay the best interest. A politician who have invested his resources, time and effort to ~~get~~ become a politician. but he would surely be prioritising public interest rather ~~personal~~ interest. Because he would have fear of being ~~disqualified~~.

If ^{write in assertive form please} any inquiry is lodged against him. A politician who come ^{suffering and} ~~from~~ after a long painstaking effort can feel the ^{pub} ~~pub~~ pain of the public. It was investment in knowledge that ~~make~~ made Zohran Mamdani, a muslim ^{mayor} ~~mayor~~ in New York city

USA, but ^{if} ~~he~~ he could not have acquired enough knowledge, he would not have gotten enough chances of becoming a mayor of a non-metropolitan city.

~~Knowledge makes a great economist who can~~
~~devise a robust economic policy.~~ is the fourth reason
 how investment in knowledge pays the best interest. A person
 who dedicates time of study Economics, is the person
 who can make a good policies fiscal and monetary and
 other policies. which can surely stabilize the
 economy of Country. Pakistan does not have has
 a good robust economist at the higher
 levels. Owing to this, its policies remained unclear,
 ambiguous, and fragile. If the Economics theories
 of Karl Marx and Adam Smith ~~with~~ are interpreted
 and aligned with modern economic problems, then the
 long standing economic issues can be resolved easily
 and countries can stabilise in no time. Hence,
 Economics theories are the investment by the great
 economist which can be used for the best interest of

Investment in knowledge shapes a good technocrat.
 with practical life experience is the fifth reason.
 Technocrats have a lot of knowledge and information
 they are highly educated with that they have per-
 experience which is used for effectively managing
 managing the government operations. Technocrats are
 the combination of practical ~~expertise~~ hands-on
 experience plus in-depth understanding of procedures
 of any work. They are ~~proven~~ proved the best,

When Government of Pakistan decentralise its state-owned Enterprises and other loss-making departments to the ~~gover~~ technocrats. These genius officers, through the practical experience and knowledge morphed the loss-making entities into profitable departments. Thus, ensuring that investment in knowledge by the technocrats pay the best interest not only at individual level but also at the governmental level.

Knowledgeable person makes society so great by taking care of others and environment is sixth reason ~~det~~ how the investment in knowledge pay the best interest. ~~Considering the climate change realities,~~ knowledgeable person adopt ~~strat~~ strategies to mitigate the environment loss by afforesting, reforesting and adopting "go green" activities. Educated person focuses on the sustainable development, and uses resources seamlessly. Moreover, knowledgeable ~~individual~~ ensure that he does not impact by any way to ~~his~~ ^{his} neighbour. He ensure that he create safe and secure environment. Hina Tilani, for stance, who fought for minorities and ensured that environment is secure and safe is the example of knowledgeable person ~~not~~ creating a good society by ~~ensure~~ environment protection.

Another investment of knowledge is that it helps in integrating the economies paying the best interest. After investing heavily heavily on their

seed education sector, educated persons decided to remove all the understandings that were created in the past, because of old-school of politicians and their personal rivalries. Putting all the grievances at a side, even educated person in the economics decided to throw these relations by through trade. People ~~start~~ started commerce among hostile ~~nation~~ countries to revive the relations.

Creation of European Union depicts a true spirit example ^{how} of nations that once used to be hostile towards each other are become good close allies of each other. However, multiple initiatives were also taken between Pakistan and Afghanistan, but these relations seem ~~blink~~ due to ~~no~~ less investment of knowledge in ~~Afghanistan~~. ~~Afghanistan~~. Ergo, ^{showing} ~~showing~~ how integration of economies is one of the best investment in knowledge which paves the best interest.

create transition among paragraphs

Eliminating the social evils from the society is the right ground how the investment in knowledge pays the best interest. Three main social evils, terrorism, extremism and superstition - is eliminated in the society where education and knowledge is appreciated. When educated person basic resources are fulfilled they do not dare to opt for illicit means. Knowing that how state will back fire them. Moreover, other illegal activities are also does not exist in the economies such as corruption, street crimes, child abuse and harassments. London, United Kingdom, where illiteracy ratio is zero, observe that there is no less or no social evils and crime rates ~~exist~~ ^{results} there. In comparison

to that, ~~a~~ South Asian countries, Afghanistan, Pakistan, Bhutan, Bangladesh and India, with all these countries have high ~~crime~~ crime rates, and criminal activities are just not a new norm in these countries. Clearly, nations' investment in knowledge pays the best interest at a societal level.

Furthermore, investing in knowledge changes the destiny of ~~of~~ the countries. ~~an~~ Educated population contribute significantly to the every aspect of the economy. Whether ^{educated person is} ~~they are~~ in business sector, service industry or ~~are~~ in any sector of economy. The best example of that changed their own destiny is India, ~~the~~ Indian state facilitated their youth in technology arena. And now, India has highly qualified and experienced youth ~~bold~~ ~~badge~~ ~~bludge~~ that is earning dollars through freelancers ~~proy~~ ~~platform~~ ~~platform~~ and increasing the ~~remitt~~ influx of dollar in the economy. Thus, that amount could be used in the Indian economy. and youth generation is ^{transitioning} ~~becoming~~ ~~changing~~ the social status in the Indian setting of ~~the~~ society. Therefore, changing the destiny of India as a whole. as India ~~the~~ contributes around 60% in freelancers market share.

Lastly, investment in ~~edu~~ knowledge enhances the productivity and efficiency of

the countries. When population is knowledgeable^{able}. It means they will understand the technicalities of related to machinery and equipment. These thousands of skilled ~~go~~ knowledgeable person would have multiple pragmatic approaches to enhance the productivity by ^{introducing} ~~producing~~ more advanced technologies and equipment. For example, Bangladesh is rich in youth. They can and mostly youth is knowledgeable, when a new machinery is imported then that youth will be easy to use that equipment. Thus, ~~at~~ investment in knowledge rises the ^{overall} ~~1st~~ productivity of the country, and helps on country get competitive advantage over other ~~to~~ economies.

To cap it all, it is highly need of time to the nations who are not pay any heed to the investment of in knowledge. It is a country's ^{gold} ~~gold~~ if they educate their youth young generation. If not, then disparity between developed and underdeveloped countries ^{write short sentence} will further widen. This way ~~unknowledgeable~~ will not be able to effectively participate in the economy. This way Country will be leave behind from the rest of world. Training and inducting young population is the only way to create a good reputation in the international environment. and country. Once, a country is left behind, then it would face ^{complicate} ~~complicate~~ to compete the world. Therefore, this essay shed lights on how the investment in knowledge pays the best interest; it ~~is~~ underscores,

making a good person, not taking informed decisions,
creating a great leader, and politicians, economists,
technocrat, taking care of environment and
sustaining, he takes interlinking the economies,
dismantling social evils, transforming countries'
faith and lastly, increases productivity in the
economy. Once a western philosopher rightly
mentioned about education and knowledge that:

"The roots of education are bitter,
but the results are fruitful"

- Aristotle.
