## Importance of Education

Write a sentence to explain these points of view

There are three schools of thought about freedom in education. Each one has own point of view. The writer is not on same page with those who believe that education has no fruitful purpose. It just provides a good ~~environment~~ environment for growth. People are living in a dense community and it would be epitome society if they co-operate ~~with~~ each other. Those who give freedom believe in Kindness, self control and trained behaviour which are nearly impossible in their actions, are unchecked. Education, from social angle, should be something more positive than just an environment for growth. It ~~will~~ must offer mental and moral equipment which children cannot learn without education.

Words of the Passage: 312.

Words of the Preciser 110.
