

"Almost Always the creative dedicated minority has made the world better"

## 1) Introduction

2) How the <sup>creative</sup> dedicated minority has always made the world better:

1) Repealing the antediluvian notions ~~and~~ and advancement in scientific knowledge

(→ Galileo ~~✓~~ Repeal

Geocentric Model

→ Newton ~~✓~~ Advancement in Physics).

2) Discovery of vaccines to reduce the likelihood of diseases

(→ Louis Pasteur ~~✓~~ discovery ~~✓~~ of cowpox vaccine

→ Corona ~~✓~~ virus vaccines)

(3) Reduction of casualties  
by discovery of medicines

(Alexander Fleming's discovery of Penicillin)

(4) Instigation of revolution to reduce the oppression of people  
(Rousseau, John Locke)

(5) Raising voice against the genocide in the world  
(\* South Africa)

(6) Emancipation of people from institutionalized discrimination  
(\* Nelson Mandela)

(7) Protection of the world from the conflicts  
(\* Mikhail Gorbachev)

(8) Protection of the world ~~from~~ <sup>✓</sup> nuclear destruction.  
(Vasiliy <sup>✓</sup> Arkhipov)

(9) Spending of wealth in charity to help the poor  
(Bill Gates charity work and Organization)

(10) The provision of humanitarian service to people  
(\* Edhi Foundation  
\* Mother Theresa)

(11) The provision of medical services to eliminate fatal diseases  
(Dr. Ruth Pynar  
Pakistan Mother Theresa)

(12) Environmental Activism and Green revolution to reduce climate change

\* Wangari Maathai ~  
Green Belt Movement

### 3- Conclusion

## ESSAY

Everybody on the Earth is ~~important~~ and serves some purpose in the grand scheme of the world. Similarly, ~~after can could may might always use a group of minority can proved to be an asset if it shuns individualism and embraces collectivism.~~ <sup>first form of verb please</sup> It is always a dedicated creative minority which has made the world a better place to live in. To begin with, <sup>plz explain who these people are</sup> some people have contributed to the scientific advancements. Similarly, the discovery of medicines have reduced casualties and improved longevity. In addition, the instigation of revolution by few thinkers has liberated people from tyrannical rule. Furthermore, the efforts of some leaders have put an end to conflicts.

around the world. Similarly, the acumen of some people has saved the world from the nuclear catastrophe. Moreover, humanitarian and medical services by people have improved the lives of people. Last but not the least, environmental activism and green revolution headed by few people have helped to reduce the negative impacts of climate change. Thus, the dedicated creative minority has made the world a better place through scientific advancements, medical discoveries, humanitarian services and try to use some more mature words it will make your writings more catching.

Firstly, the creative dedicated minority has made the world a better by repealing antidelinian notions and advancement

in scientific knowledge. These scientific advancements have made the life much more easy on the earth. Human beings have shun the primitive ways of living and thinking. To illustrate, in the early years, humans believed that all the celestial bodies revolved around the Earth as it was lying in the center. However, Galileo refute this notion, even at the cost of his life, and stated that sun is lying at the center and all planets revolve around it. Similarly, Newton had proposed his theory of gravity and laws of motion which laid the ground work for advancement in Physics. Thus, a minority of scientists has brought forth scientific advancement.

In addition, <sup>the</sup> few people have discovered vaccines to reduce the likelihood of diseases. Vaccines create immunity in the body against certain diseases. These reduces illness from diseases. For example, Louis Pasteur was the first person who discovered small pox vaccine from the cow puss. This vaccine reduced the onset of diseases due to ~~presence~~ of immunity. Similarly, the discovery of mRNA Corona Virus Vaccine by Katalin Kariko reduced the casualties from the ~~Nobel~~ Corona Virus. Hence proved, the discovery of life saving vaccine by few scientists have reduced deaths and made the world better.

Besides, few people have discovered certain medicines which have proved to be a panacea against diseases. The efforts of the few people by making medicines have increased life expectancy. For instance, Alexander Flemings has discovered Penicillin, an antibiotic drug, which have reduced deaths from infectious diseases as compared to past. In short, a minority of people has improved life expectancy by discovering life saving medicines.

Furthermore, some people have to fight against oppression and tyranny revolution to reduce the oppression of people. In the past, people were living life under despotic rulers who would not give rights to people. To illustrate

Philosophers like Rousseau and John Locke have instigated revolution in 1789 in France to liberate people from the tyrannical rulers. As a result, the French revolution has provided political, legal and economic rights to people and reduce the influence of rulers. Hence, few thinkers have brought about revolution to liberate people and provide them rights.

Similarly, <sup>the</sup> few people have raised voice against ~~genocide~~ in the world. These people refused to acquiesce to the ~~decrees~~ of selfish leaders. To illustrate, South Africa has raised voice for the extermination of ~~Palestinian~~ people at the hand of ~~Israel~~ and its allies. ~~It~~ ~~is~~ ~~filled~~

a genocide case against Israel in the International Court of Justice. In response, the International Court of Justice has forbade Israel from pursuing genocidal policies and expanding illegal settlements in Gaza. Hence, South Africa was the only country in the world which took a strong stance against Israel.

Additionally, ~~the~~ few people in the world started movement for the emancipation of people from institutionalized discrimination. Some countries adopt a prejudice attitude towards a particular kind of people to marginalize them. For instance, Nelson Mandela headed "Black Lives Matter" movement as the government discriminated against black people. Black people were deprived from political

and legal rights. They were barred from entering the residential areas and restaurants of the white people. In such scenario, Nelson Mandela struggled to provide rights to black people and ultimately became Prime Minister. Hence proved, a dedicated minority has rendered efforts to liberate people from the state discrimination.

Moreover, a minority of leaders has protected the world from conflicts. They worked in the best interest of people rather than achieving their vested interests. For instance, Michael Gorbachev, a Chancellor of Soviet Union, had put an end to cold war which led to peace in the world. He was awarded Nobel Prize for it as well. Thus, a dedicated

minority leaders have put an end to conflicts to ensure peace in the world.

Similarly, few people have used their conscious during wars to protect the world from nuclear destruction. It is because nuclear wars are not in the interest of anyone as they lead to mutually assured destruction (MAD).

For instance, during Cuban Missile Crisis when the world was on the cusp of nuclear catastrophe, Vasily Arkhipov, a Russian Navy officer, refused to use nuclear bomb. Hence proved, some people use their acumen and act in the best interest of all people.

Moreover, the few people spend their wealth in charity to help the

poor. These rich people use their wealth to bring prosperity to developing nations. Their efforts improve the life of several people. To illustrate, Bill Gates, an American Billionaire, who has spent half of his wealth, \$10bn, in charity. In the coming years, he has intended to spend the rest of his wealth for poverty alleviation. In short, a minority of rich people use their wealth for the welfare of people.

Similarly, few people spend their whole life in the serving humanity by providing humanitarian services. It is because not all people are prosperous and have resources. For instance, Abdul Sataar Edhi of Pakistan had founded Edhi foundation.

This foundation provides medical services and shelter to homeless people.

Similarly, Mother Theresa had spent all her life to help poor by providing food and shelter. Thus, the world is made better by the service of few people who spend their lives in the service of people.

In addition, some people provide medical services to eliminate fatal diseases. They leave no stone unturned to help those who can not afford medical expenses. For example, Dr Ruth Pfau, known as Pakistan's Mother Theresa, has provided medical services for the treatment of leprosy disease which was considered contagious back in the years. She rendered

her services to provide healthcare to Leprosy patients. As a result of her efforts, the death toll from Leprosy decreased. Thus, the world is made a better place by people who provide medical services to ill people.

Lastly, a dedicated minority has led environmental activism and green revolution to reduce climate change. Climate change has culminated into a global problem as it negatively effect all sectors of life. In this scenario, few people are making efforts to reduce climate change impacts. For instance, Greta Thunberg, a young climate activist, is very vocal about the consequences of climate change and the leaders' inability

to solve this problem. Similarly, Wangari Maathai, a Kenyan climate change activist, had started "Green Belt Movement" by planting millions of trees. Thus, the world is made a better place by the efforts of few dedicated people to reduce climate change.

u need to make more substantiative

In a paragraph, please

few people, a minority, have not made efforts to make the world a better place. These include people who worked for the scientific advancement through discoveries. In addition, the discovery of medicines by few people have improved the health of people. Similarly, the efforts of few leaders have put an end to wars. Moreover, few people have liberated the world from the shadow of nuclear warfare. Similarly,

A few people have served their lives for the prosperity of poor people. Thus, a dedicated minority has served the people and played their part in making the world a better place for the mankind.
