Indent the paragraph. Avoid cutting.

Renewable Energy : Deception at its finest.

Renewable energy has been put forward as the promised Messiah that will ~~save us from~~ ~~the~~ take us to a clean future. ~~However this~~

~~messiah has turned out to be the anti-christ.~~ However,

^t The green revolution paradox is that it promises a cleaner future but in reality it is killing the planet with its hidden costs. These technologies

require rare earth metals. Lands in which these resources are mined have become desolate wastelands.

The ~~of~~ manufacturing of electric vehicle batteries emits more carbon than conventional engines. In a similar way, ~~still~~ wind turbine blades cannot be recycled due to

their composite nature, solar panels ^{and} electric vehicle batteries after their use ~~also~~ become part of toxic waste. ~~be~~ To truly bring about a change,

we need to be more ^{efficient} ~~efficient~~ & practice ^{under} ~~restraint~~ ~~&~~ not ~~enact~~ another industrial revolution ~~in~~ the guise of better moral standards.
