E. Ensuring Increase in Enrollment in Pakistani Universities

1. Market based education, short courses IT and magistration, and quality over quantity.

F. Conclusion

Essay :

Once the universities in Pakistan were overflowing with discussion, debate, and determination. Today their classrooms echo with silence, benches empty, chalk untouched and future postponed. Some students sold their books to buy bread while others buried their ambitions under rising cost of education. The status of education in Pakistan is decreasing day-by-day. 20-30% decline in Punjab based universities only, which is the hub of higher education in Pakistan. There are a number of causes in decreasing enrollments in Pakistani universities including the expansion of universities without proper machinery. Moreover, the rising fee structure of universities and prolong courses in said universities. To dig deep, the degrees acquired from these universities are not market based, that is why parents and students prefer short course to enter the job market. The increasing cases of harassment is another major cause to restrict female enrollment in Pakistani universities. All these chickens coming home with a number of significant

Good well done

U are well connected in ur writings all the Best luck

Consequences, including the development gap, and Crisis of deep and critical thinking. The decrease in enrollment also stagnate the research and development of a nation leading to the under-development. Shrinking admission undermine the human growth along with soft power of a nation. Hence decreasing enrollments in Pakistani universities is a national problem, it is because of education staidly and expansion of universities which will be a crutch in development of Pakistan. Need of how is to ensure increase in enrollment to boost higher education in Pakistan.

Good u know how to write logically
substantive paragraph

To start with, the increasing number of universities in Pakistan. Too many universities, not enough quality. There are about 270 universities in Pakistan out of which 160 are public along with virtual and other affiliated ones. The expanding number of universities is ^{one} of the causes in decline in enrollment. The number of universities is increasing but the faculty and trained number of teachers is decreasing. This compromise the quality of education and student lose their interest to be enrolled. So, the expansion and too many universities is causing decline in enrollment.

The major consequence of decline in enrollment brings development gap. In the 21st century the countries are racing towards speedy development is because of their qualitative higher education. The development gap in Pakistan is snail-paced because the minds which should have been in the classroom are wandering on footpaths. If higher education

is weak, it weakens society and economy of a state. Hence, the decline in admission in universities bring development gap.

In short, decreasing enrollment in Pakistani universities is because of vast number of universities along with selling expansive degrees that are not market based. Moreover, the long and time taking programmes in universities also waste the time and money of the students. In government part there seems many negligences among those the decline in funding which down grades the structure of education and infrastructure of a institution. These problems bring shocking consequences including stagnation in research and development and increase in brain drain. The need of the hour is to ensure the increase in enrollment and rethinking of policies related to higher education. This field needs a high priority of among all subject to enhance research and soft power of Pakistan. Hence decline in education is a decline of a nation.

All the best luck
