Title : "Misdirected Energy"

Author said that, devil is the most busiest creature in the Universe. Similarly, humans also has desire to do something and the world has the potential of doing hard things but the most of their energy is misdirected. Author pointed that most of the time members ~~pe~~ waste their energy in trivial matters.

Devastating Impacts of War.

The Writer says that the main Cause of breakdown of Civilization is War. It has devastating effects on lives of people. In modern times it has become more malignant because of growth in nuclear powers and military.

In early times, when societies realized the dangers of War they followed two ways, to avoid war.

First is on personal level people tried not to participate in War, which is a heroic act. Secondly, they tried to make governments to get together to resist aggression & to reduce its causes before Wars could begin. Writers says that the second one is more effective in preventing wars.
