

2008

Title

Achieve efficiency by hierarchy.
Industries conduct ^{studies} surveys to fulfill the demand of their supplies and produce their products accordingly. Same as Services based organization conduct studies to learn about public requirement. These physical act of knowing public needs create balance ^{between} services and goods supplies to public demands.

After decade of industrial revolution, technology helps to manage task and makes department for each purpose. Now every organization has ^{hierarchy} department of decision maker unlike initial revolution days, where all power held in one hand.

The acute data of absolute targets of organization make them effective and efficient. Efficiency is the ratio of output by the input of utilities.

The function of management is to keep track of organizational activities and coordination towards completion of tasks. Whereas, coordination and team work remains open secret for 100% results.
