

Thesis Statement

Topic: Pathways to Pakistan's Prosperity

Pakistan can achieve prosperity through political stability and transparent governance, industrialization of key sectors, promoting education, social equity and inclusion, improving Pakistan's environmental conditions and by culture and soft power.

Topic: Reforestation as a Global Urgency

As forests serve as the lungs of the Earth, reforestation has become a pressing global urgency to combat global warming, environmental disasters, health hazards and mass displacement.

Topic: Impact of Social Media on Teenagers' Mental Health

Doomscrolling or the excessive use of social media exerts a profoundly negative impact on teenagers' mental health. They often become addicted to it, leading to diminished attention span and declining intellectual abilities. As a result, they experience loneliness, memory loss, and disturbed sleep patterns. Their behavior tends to become aggressive, while unrealistic expectations foster anxiety and depression. This essay will describe the impacts of social media on teenagers' mental health in coming discussion.

Topic: Role of Technology in Modern Education

Technology in modern education can have both positive and negative roles, including enhancing accessibility, interactivity, personalized learning, global connectivity, and access to digital libraries and research on one hand, while causing overdependence, digital distractions and widening socio-economic gaps on the other. Though technology has both merits and demerits, its benefits outweigh its drawbacks.
