

# Climate Change: Causes and Consequences

## Outline:

### (1) Introduction

1.1 Hook

1.2 Background

1.3 Thesis Statement: No region of the world is secure from the disastrous effects of the climate change. There are multiple socio-economic, political, natural and man-made reasons present behind this change. However, the menace of climate change can be mitigated by taking some rational measures.

### (2) Understanding the term of Climate Change.

2.1 Climate Change long-term phenomenon.

### (3) Causes behind this climate change.

#### (3.1) Socio-economic.

(3.1.1) Sprawl of cities

3:1:2

Mushroom of Housing societies

3:1:3

Luxury

3

### 3:2 Political Causes:

3:2:1

Policy failure of national level

3:2:2

Weak international organization

3:2:3

Timber Mafia

3:2:4

Populist and short term policies.

### 3:3 Natural Causes:

3:3:1

Natural Green House Gas

3:3:2

Movement of tectonic plates

3:3:2

Solar variability

### 3:4 Man-made Causes:

3:4:1

War and military activities.

3:4:2

Burning fossil fuels

3:4:3

Deforestation.

3:4:4

Industrialization.

## (4) Consequences of Climate Change.

4:1

Environmental effects

Health Risk

- 402 Poverty and inequality
- 403 Food Insecurity
- 404 Rising Temperature
- 405 Economic losses
- 406 High Sea level
- 407 Infrastructure Damage
- 408 Disease (Air Pollution)
- 409 Agriculture at risk

## (5) Recommendations,

(5.1) Ensure National level Policies.

(5.2) Govt should make things easy for people and facilitate them on basic level is key to combating climate change.

## Conclusion.
