Education is a core tool to prosperity. By turning the pages of history, the juxtaposition of prosperity and education remained invincible. A nation with weak education could be witnessed with less prosperity and growth. Similarly, some other nations such as Greece had a strong education system with a stable and blunt steep of prosperity. In contemporary era, the relation of both education and prosperity can be observed. Countries such as; U.S.A and European countries are the ones with elevated rate of literacy. On the contrary, countries such as Pakistan, Afghanistan and African countries daydream for the growth, prosperity and

progress. Education has been a significant factor in bringing the unexpected outcomes in terms of growth. For centuries, all lasting advancements have been the results of those efforts which were undertaken through education. The proportional symbiosis of education and growth ranges spectrum of factors both in zenith ~~ness~~ and nadir of a country. Enough allocation of budget, prioritizing education on educational level, access of free education, etcetera are the core factors that lead to spike, however, lack of priority and ignorance are factors that lead to failure. In short, a true success cannot be availed without required level of education.

Beijing played a very safe game to say "good-bye" to uni-polar world.

Its apparent use of soft-power, non-violent ^{progress,} and economic-boom as a tool is to get hypnotized by the north. Tianjin-SCO recent summit along with a World War II commemorial event brought the Whitehouse attention. Beijing's meticulous and diplomatic ties with several countries around the world; especially the southern ones, is an open challenge to the north to maintain such friendship with diverse forms of governments. Tianjin-SCO summit emphasized on uniformity of all countries

tendencies. Similarly, Beijing has not come to play the game of powers individually but its strategy of playing this game ~~lead~~ led it to the creation multiple blocs.

This proves the cautiousness of Beijing and Beijing its long-term planning.

BRICS+, SCO and CPEC are the stark examples.

Beijing has learnt from the collapse of USSR also, that is why it entered to the ground along with multiple blocs of south to challenge the unipolarity of U.S.A. To recapitulate, China's liberal trade policies and magnanimous ties with allies have brought a makeshift in world order.
