

Zubair

Date: _____

Day: _____

Terrorism has been recrudescant in KP and Balochistan which has ultimately affected the peace and tranquility of both provinces. Insurgency of recent terrorist attacks are the stark examples of terrorist continuous growth. Banned terrorist cliques such as; Baloch Liberation Army and Tehreek-e-Taliban Pakistan's attacks on peripheral areas are alarming. PIPS and Institute for Conflict Studies show stark growth of terrorist attacks since 2024. Recent stats show 194 deaths of civilians in 143 attacks in 2025, and 850 death toll in 520 attacks in 2024, are showing the increasing barbarianism of terrorists.

To encounter terrorism, it has to be made a pith part of NAP and also NAP 2.0. Economic and civilians' loss of both provinces is far greater than just of nominal statistics of death and casualty toll. State has to take serious and immediate measures to eliminate the evil. These steps must include political parties' role and addressing the grievances of affected families to make the plan effective and efficient. In short, terrorist insurgency is unaffordable for ICP and Balochistan at any level, that is why the institutions and government must address the issue with a comprehensive plan and strategy to ensure peace.
