Topic

Why Students fail in
competitive exams

4. Unsupportable Environment

- 4.1 unsupportive home environment
- 4.2 Company & friends circle
- 4.3 Harsh weather in exam

5. Digital Distractions

- 5.1 Excessive use of Social media
- 5.2 Impact of memes & reels
- 5.3 Doom scrolling
- 5.4 Excessive use of AI
decreasing cognitive ability.

The fourth reason behind failure is unsupportable environment besides the poor planning, unsupportable environment is also a contributing factor of failure. majority of aspirants have unsupportive home environment. Their parents and elders cannot support them to follow their dreams. Family members might not encourage

aspirants studies as many have expectation that conflict with aspirants goals. Distraction, noisy & uncomfortable environment make it hard to focus. Spending time with friends who cannot prioritize study or friends who secure their career, use distracting aspirants or pull them away from their goals. Socializing & engaging with friends in non-academic activities can reducing study time. Extreme weather conditions like heavy rain, extreme heat or cold might affect aspirants ability to the exam center timely either it they reach on time the extreme can affect aspirants focus during exam. for instance, PNIS Punjab were mostly conducting in june/july expect 2024 in these months there is extreme heat in Pakistan and in exam center not too much resources were provided to aspirants which cause them stress & discomfort

can impair their performance. Hence, unsuitable environment is one of the major reason of failures in competitive exams.

The fifth reason behind failures of candidates in competitive exams is digital distraction besides the unsuitable environment. Firstly, aspirants spend more the time on social media and wasting time on non-academic content. Spending more time on social media platforms like Instagram, TikTok and Twitter can waste their time & reduce their focus on studies. Similarly watching entertaining contents like memes & reels are addictive. For examples most students are reel addicted reels are very short video which can make student lose their focus for long-term studies. Endless scrolling through negative or irrelevant content can lead to stress and waste of time. Lastly, relying too much on artificial intelligence can decreasing

cognitive abilities. Dependence
on AI answers without
understanding the concept.
Over-dependency on artificial
intelligence and technology
might weaken memory and
problem solving skills and
critical thinking. To sum
up, failure is the result
of digital distraction.
