6- Conclusion

In Greek mythology, the story of "Trojan horse" reveal a fascinating story of view of how the Greek soldiers hidden in a wooden horse deceived the defenders of the city of Troy and entered the city. Moreover,

Sorry this is illogical story ....that has no connection with ur topic

Propaganda refers to portraying of information or reality falsely as to control or manipulate people. It has powerful impacts in the course of history from Greeks to Machiavelli and till date. Propaganda is used as a fifth generation warfare tool to control information and gain leverage.

over one's adversary. Moreover, it is employed to demonize a certain class of people or ideology, accumulate power <sup>or using artificial connectors</sup> or achieve narrow

objectives. Furthermore, propaganda has badly impacted Muslims around the world. It is used to incite Islamophobic, objectification of Muslims, ban of practicing Islamic fundamentals, and globalization of Islamic culture. This has created a distance of civilization and clash. In order to reduce the impact of propaganda on Muslims, a holistic approach is <sup>in order to tackle</sup> required unanimously by Muslims to protect themselves.

They need to celebrate  
Islamophobia day symboli-  
cally, produce opportunities  
of cultural exchange  
programmes and unity  
to protect muslims  
and the image of Islam.

Moreover, propaganda  
is used to structure and  
mould information. It is  
used to create false  
narratives to deceive  
or distort the objective  
truth. Propaganda is  
also employed through  
playing with words in  
a way to shape discourse  
or the way of thinking as  
the indirect aim.  
It also involves the fabricat-  
ion of history or information.

o attain desirable goals:

Propaganda is employed through the creation of false narratives.

A narrative which serves the interests of propagandists by changing the thinking of people, or their behaviour for a purpose. This is done through media which

plays a vital <sup>role</sup> in expanding the reach of propaganda to a wide range of population.

This is achieved through

For example, Italy's fascist leader,

Benito Mussolini, widely used media to attain

power by manipulating the reasons about enthronement of the Italian people.

They ~~make~~ choose soft words to cover ~~the~~ ~~war~~ Israel's atrocities.

They avoid words such as as "Genocide" ~~even though~~ the United Nations and ~~human rights~~ ~~organizations~~ ~~call~~ it ~~such~~

~~Propaganda~~

Propaganda is also ~~fabrication of historical facts~~ ~~is another tool~~ history or information in a way ~~to~~ to change the subjective perception of people about it. By ~~representing~~ the course ~~of~~ history in an altered way a propagandist aims to achieve his goals or manipulate ~~the information~~ ~~against an enemy~~

This mode of propaganda is mostly used by states against other states. For instance, the Indian state misrepresents Pakistan's independence movement to its people as a conspiracy hatched by the British to disintegrate India. This has caused a hatred among the ordinary Indians against Pakistan which culminates into dangerous wars.

Moreover, propaganda is a powerful tool. It is used as a mean of Fifth generation warfare tool. Propaganda is the power to convince individual class or

ideologies, to accumulate power and to achieve one's narrow objectives.

The power of propaganda is widely used as a fifth generation warfare tool in the modern world. Fifth generation warfare refers to the war of information. Through this tool, influential countries entice and shape narratives which serves their benefits. For instance, the US operation in Panama in 1990s was named as operation "Just Cause". Despite being an act that violated international law, it was

named this way to grant the operation a moral legitimacy. In this way, <sup>Good example</sup> the use of propaganda as fifth generation warfare tool, serves the interests of propagandist.

<sup>Try to link one passage to another one plz</sup> Propaganda is also employed for demonization of individuals, class or ideology besides being used as fifth generation warfare tool. Moreover, it is done by generating a discourse pointed at the subject of the propaganda. Gradually such discourse gain grounds and culminate into misery. For example, during the cold war era, both the

Capitalists and communists  
 did propaganda against  
 each other. The capitalist  
 called the communists as  
 monsters who usurp private  
 properties. Whereas, the  
 communists called the  
 capitalists <sup>responsible</sup> ~~responsible~~ for  
 class struggle and exploit-  
 ation of the poor by  
 elites. Thus, the situation  
 led <sup>U have matured here</sup> to the spread of  
 "Iron curtains" <sup>across the European continent</sup> and the  
 demonization of classes  
 and ideologies.

Other than the demoni-  
 zation of people, propaganda  
~~has~~ is a tool for the accum-  
 ulation of power. Since  
 the past, propaganda is  
 a mean for the accum-

ulation of power through  
 culminating fear, glory  
 or nationalism. In this  
 way, the propagandist  
 rally the support of  
 huge masses and charge  
 them ~~emotionally~~ and  
 drive them for the  
 accumulation of power.

~~For instance~~ For instance,  
 Hitler used propaganda  
 against ~~contingent~~ powers  
 and the jews, being ~~spo-~~spo-  
 nsible for the miserable  
 condition of Germans. The  
 propaganda, ~~emotionally~~  
 charged, gained him popula-  
 rity among Germans and  
 made him a character to

Besides the accumula-  
 tion of power, propaganda

is used to gain power  
in other domains such as  
social, political or economics.  
for the achievement of  
narrow interests. Such  
interests lay at the  
cost of broader society.

However, the propagandist  
~~fabricate~~ <sup>intentionally fabricate</sup> history and  
use language as a  
means of achieving narrow  
interest. For example,  
Hitler did propaganda  
against Jews and caused

their killing and exclusion  
from German society. This  
also led to the misdeed  
of "Holocaust" tragedy.

Hitler wanted <sup>to</sup> create the  
Germans <sup>socially</sup> ~~politically~~ and  
economically while expanding.

their political influence  
and expansion of  
territory.

Moreover, the power  
of propaganda has deeper  
implications for the Muslims.  
It led to the rise of  
Islamophobia, the objectifi-  
cation of Muslim, even  
the practice of Islamic  
fundamentals and jeopardi-  
zation of Islamic culture.

One of the impacts  
of propaganda and mass  
media is the rise of Islamophobia.  
Islamophobia is ~~the~~ a  
sentiment of hatred against  
Muslims, which largely  
started after 9/11.

that, the western world  
 widely used the term  
 of "Islamic terrorism"  
 which involved islamophobic  
 acts and behaviour in  
 the world. ~~It also led~~  
~~to the~~ ~~the~~ led to the legislation  
 of "Patriot Act" in  
 the United States. In  
 the law, security agencies  
 did extensive surveillance  
 of Muslims and detained  
 them on mere suspicion.  
 The wave of moreover, the  
 wave Islamophobia haunt  
 Muslims all date in  
 the west resulting in  
 the 'burning of Islam's  
 holy book in Sweden  
 and killing of Muslims,  
 as in Christchurch, New Zealand.

Additionally,  
propaganda by the western  
also caused the objectification  
of muslims as terrorists.  
muslims were are widely  
percieved as terrorists.  
Western movies display  
and correlate muslims  
with terrorism and evility.  
This is because of  
the 9/11 attacks  
on the US and london  
bombing etc. <sup>by terrorists</sup> Because of  
these unfortunate incidents,  
muslims are objectified  
as terrorist by the west.  
However, when christian  
do terrorism against  
muslims, as in christchurch,  
where 50 muslims were  
killed, the same media  
did not label it as

Expression improvement needs a lot of work

Christian terrorism. In fact,  
 terrorism was invented  
 long before Al Qaeda,  
 when the crusaders  
 invaded Jerusalem and  
 did mass atrocities.  
 However, ~~the~~ Muslims  
 are particularly objectified  
 as terrorists.

Propaganda against  
 Muslims also caused ban  
 on ~~the~~ the free practice of  
 Islamic fundamentals in  
 many countries. Muslims  
 face assaults on a  
 regular basis in the  
 West. For example, the  
 hijab of Muslim women  
 is banned in France and  
 the prohibition of wearing  
 hijab as per French law.

Moreover, a ban on Azaan and Friday sermon in loudspeakers is also the result of propaganda by Hindutva followers in India. The slaughter of cow in Eid Al Adha is also prohibited in India. Such ~~ban on~~ ~~the practice of~~ ~~Islamic fundamentals~~ highlights the gross violation of international law on the practice of religion freely.

~~Aside from the~~ Islamic fundamentals, propaganda has also caused the jeopardization of Islamic culture, values and norms.

World wide, Islamic culture is subjugated to Western culture due to the bias of ~~see~~ Western media against the Islamic values and norms. They display Islamic morals of modesty for women as evil. Muslims social, political and economic system is demoralised by Western media.

Try to write more proper sentences with proper paragraph sense ...avoid being gossiping. Ur positive is that I have knowledge

Moreover, the Western propaganda ~~items~~ against Muslims ~~seems~~ to be a lot of civilisations.

Western literature portray the developments of Islam in the world as threatening to Western world order. According

Samuel P. Huntington,  
 the author of the book,  
 the clash of civilization,  
 Islam is the most  
 prominent threat to western  
 civilization. Thus the  
 West in the light of  
 such ideas, take  
 conspiratory measures  
 to weaken the zeal  
 of muslims to ~~raise~~  
 make any ~~theoretical~~  
 developments. In this  
 pursuit of weakening of  
 muslim political aspirations,  
 Islamic centres are being  
 and invaded by the  
 western countries have  
 severely destroyed muslim  
 countries. For instance,  
 Iraq, Libya, Afghanistan,  
 Syria, Yemen etc.

~~Now~~ In order to curb  
the implications of propaganda  
on muslim, the solutions  
require a holistic approach.  
first, muslim should  
celebrate Islamophobia  
day symbolically.  
second, cultural exchange  
programmes should be  
arranged to promote  
the soft image of Islam.  
Third, ~~solidarity~~ <sup>Avoid writing in passive</sup> among  
the muslim countries to  
protect muslims and  
the image of Islam  
should be mandatory.

First, Islamophobia  
day should be celebrated  
world wide by all  
muslims. It should be

Islam's peaceful coexistence  
and stance against  
injustices occurring to  
muslims. This will send  
a ~~clear~~ message of

Muslims, on this day,  
should show display

Islam by making

Secondly, cultural  
exchange programmes  
should be initiated by

Muslim states to engage other nations emphasise the humanistic aspects of Islam. This will reduce the rifts and suspicions between Muslims and the followers of other religions.

As the attendees of cultural exchange programme will become voluntary ambassadors of Islam in their home country. In this way, a softer image of Islam will prevail.

This will counter the narrative that propaganda create about Muslims, as evil and bad.

Third, solidarity among the muslims is the cornerstone for mitigating the implications of propaganda and the protection of muslim. Moreover, the Organization of Islamic countries should take notice of every injustice and behaviour that threatens the ~~life~~ lives of muslim and the mafe of Islam. Without solidarity, the world will not heed to the sentiments of muslims.

Just ~~as~~ as in the Case of ~~Israel's genocide in~~ ~~Gaza which allowed~~ ~~Israel to extend the~~ ~~annexation of its annals~~

its attacks on other Muslim countries besides Gaza.

Because, Muslims lack a united action against Israel. Thus, solidarity is a must step to curb the impacts of propaganda on Muslims.

In conclusion, propaganda refers to the manipulation and fabrication of information against adversary. Propaganda is a very powerful tool for

warfare, oppression of people, accumulation of power etc.

Moreover, it has deeply impacted Muslims socially, politically and economically. Muslims require a holistic approach against

propaganda for a peaceful  
and prosperous future  
of muslim which include  
the promotion of soft  
image of muslims and  
unity of the "Ummah".

As the holy prophet (PBUH)  
said, muslims are like  
a body, when one part  
feel pain, the whole body  
become uncomfortable.

Therefore, muslims should  
become single force against  
the atrocities of propaganda.
