# Artificial Intelligence: Death of Creativity

## A. Introduction :

### Attention Grabber :

AI may not kill humans, but it can kill what makes us human, that is our creativity. "The danger is not that AI will rebel against us, but that it will obey us, while simultaneously making us irrelevant."

Yuhal Noah Harari (Nexus 2024)

### General Statement:

### Thesis Statement:

Increased reliance on AI has led to overdependency, causing decline in human problem solving skills. It has severely impeded Cognitive Capacity of human brain with respect to critical thinking, Cognitive

Bring brevity in your thesis statement

resilience and flexibility. It has also replaced creative human minds with its prompts and algorithms in number of domains such as research, journalism and various others.

### B. AI Damaging Cognitive Capacity of Human Brain Responsible for Creativity :

- 1) Use of AI, Impacts the Critical Thinking which is the Core element of creativity:
- 2) Cognitive offloading diminishes Deep Reflective thinking, leading to deteriorated Creativity:
- 3) Usage of AI Declines Cognitive Resilience and Flexibility

which are related to  
human creativity:

4). AI usage causing  
Cognitive Debt, effecting  
critical thinking which  
resultantly reduce Creativity:

5). Decline in Problem Solving Skills:

6). Erosion of Intellectual Struggles:

• AI has Replaced Creative Human  
Minds:

1). Automation of Journalism

Replacing Creative Minds with  
Generative Ideas of AI Prompts  
and Algorithms:

2). Education Shift: Students reliance  
on AI eroding their creativity:

3). Risk of Plagiarism and  
Recycled Ideas through AI  
Content Generation; killing  
Originality and Creativity:

4). Art of Story telling Replaced  
by AI prompts:

5). Gradual Erosion of Artistic  
Expression and loss of  
Emotional Depth affecting  
Human Creativity:

**Amplifies** AI Algorithm amplify echo chambers  
by showing people what they  
like, limiting exposure of  
new creative ideas:

D. Conclusion:
