WHY CSS ASPIRANTS FAIL IN EXAMS

Paragraph:-

Besides, the cause of failure in CSS exams of the aspirants is the digital distraction. This misleads the ~~student~~ aspirants from their desired goal and path. Firstly, the excessive use of social media is a medium to exhaustion of their brains. As this leads to grasping of ideas that are irrelevant in nature for their needs and requirements of the goal. Second, the impact of memes and reels lead to improper use of time. This makes the aspirant spending time on illogical ideas, which will not benefit them in the exams. Lastly, the excessive use of AI decreases cognitive abilities. The use of Chat GPT and Gemini makes the aspirant not focussed on practice and use of mental reasoning abilities. There are 6 stages classi-fied by the Bloom's Taxonomy for cognitive development.

that are Remembering, Understanding, Applying, Analyzing, Evaluating and Creating. The use of AI decreases or diminishes the ability of applying, analyzing and creating. Where as practice of all these skills develops sound cognitive abilities. Hence the digital distractions play a role in misleading and distracting the aspirants from their preparation for exams.

Convey your ideas in a well articulated manner
