## V Conclusion:

Climate Change is a great con job ever perpetrated on the world. These words were stated by President Donald Trump during his address to United Nations General Assembly. Donald Trump had undermined the security threats to human posed by the Climate Change. These false statements can never cover the dark realities of the Climate Change. Climate Change refers to shift in climate pattern over <sup>the</sup> time due to natural variability or result of human activity. Climate Change is the most harmful and enduring threat to human life. Climate Change results in destruction of houses, unavailability of basic needs, and wage of economic wellbeing of human life. Though, Climate Change is disastrous but the adverse consequences pertaining to it, can be capped through shared comprehensive mechanism and insightful policies. <sup>thus,</sup> Climate Change leads to destruction of human <sup>lives</sup> and households that make them vulnerable. Extreme famine and shortage of food induces health diseases. The increase in temperature leads to shortage of water and eventual death. Along with it, the excessive rainfall and flood disrupts the human lives. The catastrophic cloud burst demolishes all the sources of transportation. Similarly, the monsoon floods add to this vulnerability by snatching human employment. However, insightful policies and reform can be proved productive to control these harmful consequences. Further more, the succeeding paragraphs further edify how this

Climate change is the greatest security threat to  
human life.

Overall your structure is fine  
Arguments are okay but  
incorporate your thesis statement  
in the intro paragraph as well
