The philosophy of All-Ghazali — theologian and philosopher of 21st century have faced more criticism. As a thinker, he has given an argument that Quran is open for explanation like ~~like~~ water drops in the sea. According to him, "that you do not know that Quran is like a sea"? And you can search for your infinite meaning. Similarly, according to him, that once you swim in that sea you end find precious stones which can make you wealthy. Moreover, he said that, "why you believe in visualization and stay at the brink"? Furthermore, he added that, it is legal for muslims to ignore, disagree and move forward. All-Ghazali's thoughts is the best combination of tradition and innovation.
