

**1. Make a precis of the following passage about one third of its length and suggest a suitable title.**

Along with the new revelations of science and psychology there have also occurred distortions of what is being discovered. Most of the scientists and psychologists have accepted Darwin's theory of evolution and his observations on "survival of the fittest" as a final word. While enunciating his postulate on the concept of the fittest, Darwin primarily projected physical force as the main criterion, and remained unmindful of the culture of mind. The psychologists, on the other hand, in his exclusive involvement with the psyche, have overlooked the potential of man's physical-self and the world outside him. No synthesis has been attempted between the two with the obvious result of the one being sacrificed at the altar of the other. This has given birth to a civilization which is wholly based on economic considerations, transforming man into a mere "economic being" and limiting his pleasures and sorrows to sensuous cravings. With the force of his craft and guns, this man of the modern world gave birth to two cannibalistic philosophies, the cunning capitalism and the callous communism. They joined hands to block the evolution of man as a cultural entity, denuding him of the feelings of love, sympathy, and humanness. Technologically, man is immensely powerful; culturally, he is the creature Stone Age, as lustful as ever, and equally ignorant of his destiny. The two world wars and the resultant

cannibalistic philosophies, the cunning capitalism and the callous communism. They joined hands to block the evolution of man as a cultural entity, denuding him of the feelings of love, sympathy, and humanness. Technologically, man is immensely powerful; culturally, he is the creature Stone Age, as lustful as ever, and equally ignorant of his destiny. The two world wars and the resultant attitudes display harrowing distortion of the purposes of life and power. In this agonizing situation the Scientist is harnessing forces of nature, placing them at the feet of his country's leaders, to be used against people in other parts of the world. This state of his servility makes the functions of the scientist appear merely to push humanity to a state of perpetual fear, and lead man to the inevitable destruction as a species with his own inventions and achievements. This irrational situation arises many questions. They concern the role of a scientist, the function of religion, the conduct of politician who is directing the course of history, and the future role of man as a species. There is an obvious mutilation of the purpose of creation, and the relationship between Cosmos, Life, and Man is hidden from eyes; they have not been viewed collectively.

CS 1997 Paris

## Science and Culture: A Disordance

Alongside the emerging discoveries of science and psychology, there lies <sup>lacuna</sup> lacunas in the existing ones. Darwin's theory of survival of fittest emphasizes the physical strength and sidelines the working of mind. Similarly, psychologists have ignored man's physical existence and external world. This imbalance prompted an economy-oriented civilisation with deleterious capitalism and communism. Both hinder the cultural development, depriving man of human emotions. The technologically advanced man is culturally primitive and <sup>backward</sup> <sup>1</sup>. The horrors of world wars are indicative of the gulf between humanity and power. Politicians misuse technology against other people which foretells a catastrophic future <sup>for the human species</sup>. It also invites inquiry into the role of scientists, politicians and religion. Currently there is a disruption among them as they are viewed discretely.
