Higher education sys in Pakistan

Bring clarity y your ideas

All sentences must be integrated

and coherent

Infrastructure of most universities in Pakistan lack proper education environment for faculty as well as students.

Allocation of proper budget can improve universities infrastructure that will make education system efficient. In civil engineering, departments equipments of ASTM standard (such as compressive testing machine and Flenuval testing machine help students understand difficult concepts more effectively. These advanced testing machines of every relevant field will facilitate the students to understand theoretical concepts. Similarly, fulfilling the demand of classrooms, laboratories, libraries and seminar-halls especially in government universities will equip the students with proper technical education. Construction of new buildings brings improvement in student's learning. On the other hands classroom with Heating Ventilation and air conditioning (HVAC), projectors, suitable sitting chairs and wooden desk with ^{attached} computer makes the professor delivery efficient. Equipped classrooms with proper facilities enhances the teaching environment. Lastly, advanced solar panel shuttles should be available across the campuses of universities to facilitate majority of ~~hostel~~ ^{proper} hostellites to reach classes on time without any stress. Proper transportation system will increase

student's attendance in classes. Therefore proper infrastructural development in universities will ~~will~~ overcome the shortcoming of Pakistan's higher education.
