

Artificial Intelligence and the Future of Developing Economies: Opportunities and Inequalities

Outline

1- Introduction

Plz c first word of topic is AI so prioritize

Attention Grabber

General Statements

Thesis statement: Developing economies can become developed economies by hampering inequalities and fostering opportunities gifted by Artificial Intelligence.

2- Opportunities of AI

2.1- Advanced Industry; innovative ideas and demands of international market

2.2- Improve agriculture; New techniques, selection of crops by weather detection

2.3- Education sector; easily accessible, advanced level, international standard

2.4- Social sector; maintaining a health, infrastructural ideas, community surveillance

2.5- ~~Technology and innovation~~

3- Inequalities

3.1- Blockage of creativity; ~~technology and innovation~~

3.2- Developers lack access to users; lack of privacy

3.3- Religious and cultural ambiguity; can not understand complexities

Rising unemployment; poverty

3.5- Lack of digital literacy

4- Challenges

4.1- Lack of awareness and acceptance

4.2- Religious sentiment; Fatwa on technology

Plz write more practice and relevant to topic points

5- Solutions

5.1- Teach use of AI, local, industrial and agricultural sector

5.2- Maintain a balance; for advancement and addiction.

6- Conclusion

Artificial intelligence is a gem in the crown of ruling advanced technology. Technology has a long history and has a long history of being used by man. It is a tool that has helped man to overcome his limitations and achieve his goals. It is a tool that has helped man to create a better world for himself and for others. It is a tool that has helped man to overcome his limitations and achieve his goals. It is a tool that has helped man to create a better world for himself and for others.

Avoid writing in passive plz

It does not contain any meanings

Day: _____

Every era of human civilization contributed in advancing technology. The journey from a creation of wheel to artificial intelligence. Here man is a master and his creation is master of ^{all} masters.

However, the dark side is the confusion of man to rule or to be ruled. In present time, the use of artificial technology is present in every field but no doubt restricted to developed world. It contributed huge economic structures of developed economies. No doubt, artificial intelligence whether in form of chat GPT or deep seek, is an ^{Avail itself} commodity of developed world. Therefore, developing world like Pakistan must avail this opportunity to give birth to new opportunities in every field of life.

There is no harm in use of artificial intelligence. Pakistan being a developing country can
