Climate Change

Outline of the Essay

1. Introduction:

1.1 Hook.

1.2 Background

1.3 Thesis statement: Climate change is an urgent global crisis, caused by burning of fossil fuels, greenhouse emissions, Deforestation and volcanic activity, resulting in dire consequences such as intense droughts, water scarcity, wildfires, and irregular rainfall patterns.

2. Causes of Climate change:

2.1 Burning of fossil fuels

2.2 Greenhouse emissions

2.3 Deforestation

2.4 Volcanic activity

3. Consequences of Climate change:

3.1 Intense droughts

3.2 Water Scarcity

3.3 Wildfires

3.4 Irregular rainfall patterns

4. Measures to cope with climate change

4.1 Switching to renewable energy

4.2 Reducing carbon emissions

4.3 Adapting climate resilient infrastructure

4.4 Afforestation

5. Conclusion

5.1 Concluding thoughts
