Iran-Israel War:

Analyzing the geopolitical context, it is believed that the War between Iran and Israel is not a war between two countries but a persistent threat to the broader level. By broader level, it is stated that when an uncertainty and odd situations happen in the world—it becomes a threat for every single creature in the world. The war is actually changing the regime in Iran from Israel's side and controlling its nuclear power through destroying Iran's infrastructure. From the perspective of Israel's motive to escalate the war, most of the critics and scholar opine that Israel not only wants to continue this war to damage Iran's nuclear program but also weakens Iran's alliances with other militant groups and parties. It seems pervasive through the US's assistance to Israel in order to amplify the intricacies of this war. Similarly, from the perspective of Iran, it is clear that Iran's audacity to maintain the deterrence hierarchy through competing with Israel by attacks and counter attacks. This shows the power of Iran to maintain its sovereignty. Moreover, it is a global threat as can be observed through the surging of oil prices in the whole world.
