

Stone age.

Geopolitical outcomes ~~cannot be achieved~~  
through ~~aggressive force~~ its geopolitical  
fundamentally depends upon Strategic Planning  
Strength and leverage over territory and  
resources. However, Trump often adopts  
the brinkmanship approach to pursue  
his national interest. For instance,  
Sudden attack on Venezuela and  
arresting of president to keep  
leverage over energy sites. In addition,  
attack on Iran to gain his interest  
vehemently intensified war. This escalating  
war not only detrimental for US-Israel  
but also other gulf countries are  
in engender because, the closure of  
Strait of Hormuz halts 20% of trade  
of oil and gas. This implies that  
peaceful negotiations are direly needed  
instead of showing hubris. Trump should  
understand that geopolitical ~~for~~ outcomes  
can be pursued forcefully and through  
aggressive policies.
