

# ASSIGNMENT:- 1.

## Brainstorming:-

# Outline:-

## 1 - Introduction:-

- Definition of Climate Change
- Brief overview of global warming

• Thesis :- Climate change is primarily caused by human activities and has severe environmental, economic, social, global, political consequences.

## 2 - Background:-

- Industrial revolution as starting point.
- Increase in greenhouse emissions.
- Global recognition (climate becoming an international concern).

## 3 - Causes of Climate Change:-

### A. Human Cause

- 1 - Greenhouse gas emissions (CO<sub>2</sub>, methane)
- 2 - Burning of fossil fuels.
- 3 - Deforestation.
- 4 - Industrialization and Urbanization.
- 5 - Agricultural practices.
- 6 - Waste and Pollution.

### B. Natural Causes:-

- 1 - Volcano Eruptions.
- 2 - Solar Radiation changes.
- 3 - Natural Climate Variability.

#### 4 - Consequences of Climate Change:-

- 1 - Environmental Impacts.
- 2 - Economic Impacts.
- 3 - Social Impacts.
- 4 - Political Impacts.
- 5 - Global Impacts.
- 6 - Impacts on Pakistan.

#### 5 - ~~Challenges~~

- Lack of awareness.
- Weak governance and policies.
- Dependence on fossil fuels.
- Inequality between developed and developing countries.

#### 5 - ~~Solutions~~

- Reduction in emissions.
- Afforestation and reforestation.
- Strong climate policies.
- ~~Public awareness~~

#### - Critical Analysis:-

- Climate change as a multi-dimensional issue.
- Need for collective global action.

#### - Conclusion:-

- Restate severity of climate change.
- Emphasize urgency of action.
- Hope for sustainability future measures.
