# Climate and Policing

Climate and Policing:-

Climate which is changing day by day ~~and~~ becoming more dangerous for different countries. AFD says that Pakistan loses \$2 billion a year due to climate change. Beside for countries is it also challenging for police. Police department duties have increased, the department have to handle the issues which are related to climate change. Police is the front line of the country. When ever any disaster comes the police department has to act like the barrier. As it has become a challenge so the police have to deal with both challenge with the crimes and upcoming disasters, disasters.

Disasters increase water shortage, dams level, flood, electricity outage. Families move from rural areas to urban areas, crimes may increase, putting more burden on host communities and a greater burden on police to solve dispute and resolve crimes.

Flood can easily damaged the crops, building, homes, towns, villages and easily creates an alarming situation. with this extreme situation the crimes also increases. This situations clearly opens the doors for the

Thieves to easily stole whatever they want. Besides -thieve, ~~not~~ citizen which are safe, also got the chance to steal available thing. Once in 2011, flood was on its peak on the mountainous areas. Someone, just broadcast the news about fastly coming flood. Most of the people get afraid and cleared their homes openly. Thieves took the great chance to enter in the home and steal everything like it is a piece of cake.

Disaster management group should collaborate with NDMA and PDMA. As most of the tourists come to Pakistan. There is a basic need to fully control on the upcoming situation. They safety of the tourist should insured by the police. Any melting of glaciers are under observation and informed.

Climate is a public safety challenge. Police can only be on the front line. If they are prepared with the training, planning, finance and coordination.

read newspapers extensively  
specially express tribune  
dont read dawn  
work on basic grammar and spelling  
basic grammar is extremely weak
