well organized and quite relevant

D. Conclusion:-

ESSAY:-

Since beginning, Pakistan has been facing economic issue. The economy of Pakistan has constantly affected due to many factors. The goal of CPEC to improve economy of country through facilitating regional connectivity.

This strategy can improve infrastructure for the betterment of country. It can ~~lead~~ ^{lead} to facilitate trade route for the other countries to enhance economy. It can improve energy independence to run power plant. As well as its challenges can ~~effect~~ ^{affect} the Pakistan. It can ~~effect~~ ^{affect} economy of Pakistan through heavy debt. It can ~~straining~~ ^{strain} finances and creating dependancy, with significant portion owed to China. It can ~~effects~~ ^{affect} the security of country and Political concerns. For this project, China will also demand their interest related this. There are various ~~argument~~ ^{arguments} for the opportunities and ~~challenges~~ ^{challenges} are given.

CPEC has continuously contributed to Pakistan's economic growth by attracting large-scale foreign investment. According to Pakistan Planning Commission, CPEC involves investments worth over \$62 billion, making it one of the largest FDI inflows.

in the country's history. These investments have helped to stabilize Pakistan's economy, particularly during the period of low foreign reserves, and have strengthened bilateral trade between China and Pakistan.

Similarly, Energy projects under CPEC have played a vital role. It promotes the electronic shortage of Pakistan. It played a vital role in Sahiwal coal power plant, and official records from ministry have shown that, it has added 10,000 megawatt of electricity to national grid. Through this project it reduces power outages. It has supported industrial growth across the country. ~~It enhances the economy of Pakistan through energy independence.~~

try to write with more logic and with more

However, it has improved infrastructure through the construction of roads, railway. Through these roads, trade can be done. It can enhance the opportunities for trade route also. The Karachi line motorway, Hazara motorway

and upgradation of ML-1 railway line are the best examples of these infrastructure. Gawadar Port serves as the critical maritime gateway for CPEC, connecting China, Central Asia, middle East, offering China a shorter trade route by-passing the strait of Malacca, and promote economic growth and regional connectivity.

Furthermore, it has created employment opportunities, particularly in underdeveloped area. According to Pakistan's Ministry of Planning, over 192,000 direct jobs have been generated through CPEC projects so far. Provinces like Balochistan and Khyber Pakhtunkhwa have benefited from road construction, port development, and energy project, helping reduce regional disparities.
