Scientist and psychologist have accepted Darwin's theory of evolution and his observation. Darwin has adopted physical strength as a touchstone of fittest. Psychologist has observed potential of man. No attempt made to combine both approaches.

no coherence and no sense of sentences

This leads to civilisation on the base of economic consideration which is converted into economic being. The modern man used two philosophies: capitalism and communism. These two philosophies together restricted the evolution of man as cultural being and from different kinds of feeling.

Scientists are using natural forces for the destruction of other countries. This raised many questions concerning role of different prayers that are guiding human history. The relationship between universe, life, and man has not been studied collectively.

Title:

Economic consideration and human Evolution.
