

# Reading Comprehension Passage of CSS Paper - 2018

Read the following passage carefully and answer the question that follow

## Questions

1. Instead of making machines our servants the author says they have become our <sup>masters.</sup> ~~servants~~. In what sense has this come about?

Instead of making machines our servants they have become our masters because we have become more dependent on machines. We find it difficult to work or play without the machines. We used most of our time to make more and better machines, but not try to become more civilized. Due to our great dependency and giving more time to machines, if they have <sup>become</sup> (taken) as our masters, not our servants.

2. The use of machines has brought us more leisure and more energy.

But the author says that this has been a curse rather than a blessing.

**Why?**

The use of machines has brought us more leisure and more energy but the question is <sup>what</sup> ~~what~~ <sup>to</sup> do we ~~do~~ with all this time and energy?

We do very little work and spend most of our time to make machines and spent more of our energy on machines. So,

this show that the time and energy machine gives us is not productive. This

<sup>does not</sup> make us not civilized. ~~Because, we spent~~

most of our time with machines and less

time with peoples. All this show that

this has been a curse rather than

a blessings.

3. What exactly the meaning of 'Civilization'?

Do you agree with the author's view?

Civilization means the society, culture and way of life of a particular area. <sup>Man is</sup> Being civilized mean making and linking beautiful things such as thinking freely, living rightly, and maintaining justice equally between man and man.

Yes, I agree with the author's view.

~~Because~~ he is right when he said people paying more attention on machines rather than the civilized activities. They become servant of the machine not the masters of the machine.

4. "Making more beautiful things" what does this expression mean? Make a list of beautiful things that you would like to make and how you would make them.

"Making beautiful things" means to finding

out more and more about universe,

to ~~removing the causes of (issue) fights~~

~~between the nations~~ to discovering how to

prevent poverty and trying to make our

civilization greater. This beautiful things

helps us to become a great nations and civilization.

The beautiful things I would like to

do are:

(i) Providing education to every child in all over the country

(ii) Providing job opportunities

(iii) To help the old peoples that are doing work in this age to run their houses.

I will make it by making schools in all over the country providing free education to childs from primary to secondary levels.

This schools not just give benefits to childrens also make jobs oppotunities for youngs as a teachers and for old peoples as a

watchman etc. This makes our economy better

and a good civilized society.

5. Mention some plans you may have to prevent poverty in the world. Who would receive your most particular attention and why?

Some plans that I have to prevent poverty in the world are:

① Providing universal access to quality education

② Generation of job opportunities

③ Trying to make good governance policies to prevent corruption in societies

My most particular attention on providing universal access to quality education because education is the most powerful weapon against poverty. It enhances employability.

Reduces inequality and breaks the intergenerational cycle of poverty. Lack of education permanently damage the potential of a society. As it is a saying that

"Nothing but education defines the future of a person and future of a nation."

So, education should be given to every child for better future and for a better nation.

answers are too long  
be precis and to the point  
dont over explain
