## 4. Conclusion

# Essay

"Media can be an instrument of change but it can also be an instrument of deception."

The above statement by Noam Chomsky paints the dual nature of media, as ~~it can be used as~~ a ~~transformative~~ tool to bring change but it can also ~~be used to~~ manipulate the narratives of people. Since the British mandate period to the present day, media has played an effective role in Palestine-Israel conflict. It has shaped the narratives of people from early times of print media to present day's electronic media. It ~~has~~ ~~used~~ uses filters to ensure that public supports the interest of powerful. From weaponization of narrative to imposing restrictions on the journalists from other side, media has deceived many. However, despite this negative process, Media, ~~if~~ used well can ~~could~~ become the voices of voiceless. Through empathy centric reporting, ~~media can be~~ a powerful tool in shifting global power dynamic and ~~reveals~~ <sup>it can</sup> reveal the real picture of war, conflict as media possesses the potential to challenge the dominant narratives and humanizes those

affected by conflict. Media plays a dual role in Palestine-Israel conflict: ~~from~~ manufacturing consent for ~~powerful~~ to adopting peaceful journalism, it fundamentally shapes global perspectives and influences the trajectory of ~~Palestine-Israel conflict~~.

~~well done~~
