

Cyber Security as the new National security Frontier.

Outline

I. Introduction ✓

II. Manifestations that Cyber security is the New National Security Frontier:

(A) Hacking ✓ of critical infrastructure
case study: Russia ✓ involvement
in USA ✓ general elections

(B) Stealing ✓ sensitive information
case study: US ✓ influence in
stealing information of war heads
deployment ✓ of china

(C) Amplification ✓ of deepfakes with
artificial intelligence (AI) ✓
case study: Quote of Sam
Altman ✓

(D) A precursor ✓ to ✓ the organized

Crime

Case study: ~~Hagani~~ networks in UAE.

(E). A tool for ~~fifth~~ generation warfare

Case study: ~~Tehreek-e-Taliban~~ ideological ~~manipulation~~ of religious teachings

(F). Source of ~~Social~~ Unrest

Case study: ~~Arab~~ springs 2011

(G) Enabler of ~~online~~ financial scams

Case study: Report of ~~PIDE~~

III. Way forward To ~~Combat~~ Cyber security Breaches, to Protect National Security:

(A). Bring new ~~cyber~~ laws

Case study: ~~Encryption~~ protection laws in ~~China~~

(B) Improve ~~internal~~ ~~coordination~~

Case study: Turkey's cyber combating
policy ✓

(C). Spread awareness ✓ among people
case study: Reference of boots
by Noah Haveri ✓

(D) Enhance ✓ institutional capacity
case study: Report of independent
think tank ✓

well done

(E) Build ✓ regional ✓ Cooperation
case study: Utilize RATT
structure of SCO ✓

IV. Conclusion: ✓

well organized and quite relevant

Noah Harari, in his book *21 Lessons for the 21st Century* said, "This century is the century of soft warfare." By soft warfare, he meant that information is the new weapon in the 21st century. This weapon is widely used in carrying out the malevolent activities. The activities include the hacking of critical infrastructure, stealing of sensitive information and a replication of deepfakes with artificial intelligence. These ill actions are making the cyber security a new national security. **write in formal terms please** The discussed arguments are the manifestations of cyber security breaches. **there require a** To combat these breaches, there required a comprehensive policy framework and potential implementation strategy. Some important measures included the introduction of new cyber laws, improvement of internal coordination and spreading awareness among the people. When these measures will be implemented

___/___/202

Day: _____

in true letter and spirit of cyber sec-
urity will become a ~~major~~ ^{signature} of nation
at security

will be implemented

has become ~~netshell~~, cyber security
is becoming a new national security
frontier as the information is a
new weapon depicted by ~~Noah Harari~~.
This sensitive security domain is
breaching and ~~making the country~~
vulnerable to ~~vulnerable~~ attacks is
a tool for fifth generation warfare,
source of social unrest and enabler
of online financial ~~seams~~. To protect
the country from these ~~breaches~~, it
is pertinent to ~~enhance~~ institutional
capacity and build ~~regional~~ cooperation.

try to write with proper structure and with
proper word choice
