

Quotas are Essentially against Equality

1 - Introduction

2 - What is the Equity and Equality.

3 - How quotas treat people unfairly while trying to create fairness.

3a - Seats allocate on the base of category, not on the base of competence.

3b - Create new inequality for those outside the quota

3c - Quotas selected less capable individuals.

3d - Focus shift from skill-building to relying on reservation.

3e - Quotas used as a political tool for vote-bank rather than empowerment.

3f- Quotas create depression for those working hard.

3g- Fuedals use quotas as a tool to give the seats on base of favoutism.

4 - How quotas are helping to create equality.

4a- Women, minorities and marginalized groups become the part of policy making through quota.

4b- Quota helps to include the supressed group in legislation process.

4c- Women and gender getting the admission in educational institution on the bare of quota.

4d- Marginalized communities getting the Jobs on quota

5 - How can create the equality and eliminate the quotas.

5a - Increasing the labor force in STEM fields.

5b- Providing the free qualitative education for all.

5c- Eliminate the unfair culture practice and social norms.

5d- Implementing the role of law in rural areas.

5e- Ensuring the participation of all communities in all spheres of life.

6- Conclusion -

A young boy worked hard, but he lost the seat because others gain on the basis of quota.

Quotas use as a tool to create the equality

but it creates the unfairness as well. Quotas

creating the grievance. People ^{are} focusing on

quota rather than to enhance the professional

skill building. It is using as a political

tool to collect the votes in rural areas

rather than the empowerment and productivity.

Due to this quota system, less capable people are becoming the part of system and skill labor is going in depression. Electeds misuse of quotas, they give the benefits on the base of favouritism not on the base of equity. But somehow it is helping to create the equality in society.

Women, minorities and marginalized communities getting the education seat ^{on the} of quotas. Furthermore, these people getting the jobs on quotas and getting the opportunities to become the part of policy making. Women and minorities have the reserved seat in parliament and they participating in legislation process. However, quotas are creating the inequality while trying to create the equality. State needs to fix the problem from the root. When the goal of equality achieve, eliminate the quotas system.

Foreign Aid: Road to stability or recipe for Disaster?

1- Introduction

2- What is foreign aid

3- Why foreign aid provides a road towards stability

3a- Foreign aid helps to build climate Resistant infrastructure.

3b- Foreign aid uses to improve infrastructure of educational institution and open the new one as well.

3c- Foreign aid contribute in health sector to provides the free qualitative health services.

3d- Foreign aid helps in gender development to promote the equality.

3 e- Diplomatic Relation become strong among countries

3f- Foreign Aid reduces the poverty and inflation.

3g- Foreign Aid strengthens the political stability.

3h- Foreign Aid improves the skill and technical development

3i- New development projects start through foreign aid that helps in future for the growth.

4-  CPEC : A road towards stability through aid - A case study

5- Why Foreign Aid considered as a disaster?

5a- Implementation of donor driven policies.

5b- Dependence on foreign Aid rather than self dependency

6 - How foreign aid use efficiently for the better outcomes.

6a - Starting the short term development project.

6b - Enhancing the Transparency mechanism while distribution of the resources.

6c - Using the aid on prioritize sectors like Education, IT, Health.

6d - Using the principle of equity not the equality while allocating the resources.

6e - Prioritizing grants over loans.

7 - Conclusion.

South Korea was a fragile state after Korean war. But through foreign aid it transform fragile to stable state. If the foreign aid use in effective way it is a good element. But aid not use in proper manner it becomes a disaster. Through foreign aid state can provide basic health and educational facilities. State can build the climate resist infrastructure. Aid can be used in gender development project to promote the gender equality. When states start the bilateral or multilateral help through aid than diplomatic relation become strong. Aid helps to underdevelop and vulneable countries to reduce the poverty and inflation. States can start new development project through aid and in the outcome people get the employment. Foreign Aid is a double edge sword. Aid helps towards stability if it use effectively. But overdependence on aid is a recipe of disaster.
