## Education and Social change

The process of social change has been changing the patterns of educational sector. On the prospective of social change, the educational institutions should be change it curriculum according to demographic and technological change. The responsibility of educational sector will be to teach natural sciences, social sciences as well as new technological skills. However, a huge immigration from south pole to north pole has uprised numerous cultural issues. Now, it is a concerns of social sciences and educational institutions to resolve it.
