

PRECIS WRITING: (PMS PUNJAB 2019)

Title: Lessons of History

History is the study of past and future. People who don't learn from their past don't succeed, while those who critically evaluate it make their future secure. They comprehend their past with sincerity to analyze those values that led to the rise and fall of their civilization. They preserve their memoirs, learn from their mistakes and adopt those traits that led to their rise. On contrary, people and states with murky future ignore their past with no lesson learned. They eulogize their past without benefitting from it.
