## I - Role of Social Media

Social media is playing an important role especially in the current age. It has significant impacts on human's life in many ways. Through social media, the world has been changed to a global village. People from different corners of the world are connected with each other. Additionally, it also plays role in education as a source of education on various platforms and a lot of information on one topic is available. Its scope is not limited to just education and connectivity, but also in business sector. Today, all the businesses are shifting to online, just one click away, it saves time and human effort. People now are more aware about happenings in the world than the past time. They are also aware of their fundamental rights and evolution in culture and many more things. People, today can speak and listen to the world through different social media platforms and promote their values, culture, language etc. Different platforms like youtube, Facebook, Instagram, Tiktok etc. can also be

used as source of entertainment. Mobile phones use these applications, instead of sitting in front of television for hours. For entertainment they can see, watch and listen whatever they want and ~~wherever~~ at anywhere. In the nut shell, today social media has become an important part for humans, in a way that they can perform their day-to-day tasks while sitting at their homes which saves time and human physical effort.
