

Climate Change: Causes and Consequences

Outline :-

Introduction

"I have long understood that climate change is not only an environmental issue - it is humanitarian, economic, health and justice issue as well."

Frances Beinecke

As we know Pakistan remains increasingly vulnerable to the devastating effects of climate change, facing record breaking heatwaves, water scarcity and extreme weather events that threatens lives, infrastructure and livelihoods.

• Causes that leads to climate change

(A) Energy and Industry

- i- Burning fossil fuels
- ii- Heat and electricity Production.

iii. Transportation.

B- Land Use and Food

- i- Deforestation
- ii- Agriculture

C- Anthropological Concerns.

- i- Urbanization.
- ii- Waste management.
- iii- Over-population.

Consequences by climate change.

A- Environmental Hazards.

- i- Ozone layer depletion.
- ii- Extreme weather.
- iii- Water scarcity.

B- Social Concerns.

- i- Migration.
- ii- Deforestation.

C. Health Concerns.

- i- Respiratory disorders.

D. Economical Impact

- i- Infrastructure damage.
- ii- Imbalance Economy.

E. Agricultural Aspect

- i- Soil Infertility
 - ii- Overuse of fertilizers
-
