- ③ Encouraging entrepreneurship and business models
- ④ Stricter law implementation and close watch-dog
- ⑤ Increased awareness through civil societies and political movements
- ⑥ Subsidizing support programs and providing social safety nets
- ⑦ Jobs creation to reduce elevated ration of crimes

VII: Conclusion

"Men ~~on~~ argue, nature acts."

Voltaire

good

Human beings have been living on this planet for thousands of years. They used to live in caves which would provide shelter. With passage of time humans started to collect foods and learning from nature. They started living together in small groups. Consequently, societies were formed. The advancement of humans did stop to societies only - they established states and international communities for their survival. The journey of human beings from caves to modern advanced world order has come along with some catastrophes. These in return back-fired and endangered the growth and prosperity of them. Realizing the threats, humans sort out steps to continue their journey without harming others. It led to a national & international

treaties, legal reforms, green initiatives
and use of modern tools. On the
other hand, these measures are
challenged by some factors such
as; rapid growth of population, lack
of political will and structural
failures. ~~These hurdles can be~~
~~countered by timely measures~~
~~to ensure long-term progress and~~
~~prosperity.~~
