Essay

"Prepare and Prevent,
Don't Repair and Repent."
(Anonymous)

In the 21st century, disasters have emerged as a threat to human survival. From devastating floods to deadly earthquakes and intensifying heatwaves with alarming regularity.

Although disasters are unavoidable but effective management and preparedness can reduce human, economic and environment losses.

In a world marked by climate change and environmental storms, preparedness has become the decisive factor that separates survival from catastrophe. Like other Asian countries, Pakistan continuously suffering from natural and human disasters that threaten to affect the lives and livelihoods of its citizen. Unfortunately, Pakistan is not fully prepared to counter it.
