

QUESTION 1. The soviet invasion on Ukraine in 2022 is the beginning of another era of cold war. Analyze the statement with reasons.

### Introduction:

Russia, under President Putins' Revisionist Command, has invaded Ukraine in 2022. This historical breach of International Law and principles of UN charter are a reflection of cold war. The cold war, fought with opposite narratives and ideologies is characterized by no violent attacks or killings (i.e no holocaust or blitzkrieg) but competing ideas. Similarly, Ukraine invasion by Russia was aimed at annexation, extension of territory and influence. The issue wasnt superior vs. race or enduring rivalry, but commonality and irredentism.

### (3) Economic Sanctions and Dedollarization - New Dimension of New-Cold War:

The previous coldwar was essentially focused on tackling expanding political ideologies.

In present times, due to globalisation wealth of states is an exemplary tool of power. United States has imposed SWIFT sanctions on Russia, freezing multiple bank accounts so that economic decline can lead to weakening of stance.

what combines China and Russia is: the concentration of power in centralized commands.

#### (5) Nuclear Deterrence - A common agenda:

Between coldwar and this Russian invasion, the threat of use of nuclear technology is same.

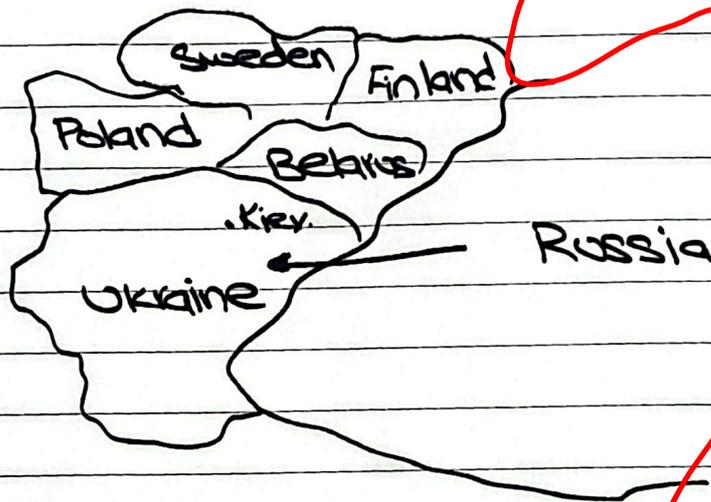

Both feared Mutually Assured Destruction (MAD). The NATO expansion, Russia extensive military spending all threaten the neighbours.

#### (6) An Insight into Ukraine Crisis:

It all started when US offered Ukraine NATO's membership as a part of its existing expansion agenda.

Ukraine, for Russia, is not just a neighbouring country, but a

strategic buffer against NATO and western-backed European countries. USA's idea to land right in the backyard of Russia is posed as an existential threat to it.

In an aggressive response, Russia invaded Ukraine. It is notable that it has irredentist claims over the premier too. In 2014, Crimea has already been annexed.
