

## ( Globalist delusion )

There are two perspective regarding globalization. Some one believe that the international community is highly desirable to resolve the pressing issues. Others says that ~~nation~~ legitimate nation, ~~and~~ individual responsibilities and their outcomes are the fundamental ~~ness~~ necessity to resolve the burning issues.

However, in my opinion the international consensus is solely needed to sort out global issue related geoeconomic and geopolitical issue.

It is highly observed that, the bone of contention between Iran and israel was is the hegemonic dominance of israel in the middle east. As israel aims to weaken Iran due to its nuclear capabilities. Due to increasing these capabilities in the middle east, Israel is exploiting the support of USA for its own interests. whereas the United State is assessing israel

despite a significant loss due to closure of Strait of Hormuz. Moreover, it is argued that in 2003 Iran was being accused of developing nuclear capabilities despite NPT treaty. Iran was inspected by the inspectors of IAEA, where they could not find any concern evidence. America and Israel intended to invade Iran but they failed. However, the ongoing conflict seems to be very intensive. Notwithstanding of prolonged ongoing war, other countries, such as China and Russia, have not taken any step to dismantle issue. It is argued that, the global consensus and support is needed significantly to make the countries safe and prosperous.
