

Revitalising agriculture sector of Pakistan

outline

A. Introduction:

- 1- A country born with fertile plains face food insecurity.
- 2- Despite employing nearly 33% of the labour force, Pakistan's agriculture struggles to feed its own economy.
- 3- Thesis statement:

The agriculture sector has deteriorated due to outdated farming techniques, water scarcity and mismanagement and limited access to quality of seeds and fertilizers. However, it can be revitalized through the adoption of modern technology, prevention of soil degradation, and increased investment in agricultural research.

B- Reason for the deterioration of the

A large portion of Balochistan's population is suffering from acute food insecurity. ^{The} FAO estimates that nearly 27 million people in Pakistan lack sufficient access to food. On the other hand, Pakistan has had one of the largest irrigation systems in the world since its independence. A significant portion of Pakistan's economy is derived from the agriculture sector. Unfortunately, the agriculture sector has deteriorated due to outdated farming, water scarcity and mismanagement; and limited access to quality of seeds and fertilizers. However, ~~it can be reversed~~ **avoid writing in passive please** through the adoption of modern technology, prevention of soil degradation, and increased investment in agriculture research.
