Conclusion -

Essay

As per usual, the bus on its way to pick up the girls from their home. When it arrived at the University gate, however, there was a noise, breaking of glass, there was blood and organs all over the floor. Bus was half destroyed by the blast, leaving 6 people dead and 15 other injured. This means if a blast not that heavy but still organs of people were on trees, floor and blood all over the bus it did damage and killed 6 lives then what a powerful weapon can do. Everybody is aware of the Nuclear power and the risk is also known. Nuclear destruction can be in billions depending on the material present in the Nuclear. Nuclear risk has always been a challenge since the attacks done in Hiroshima and Nagasaki people of Pakistan are aware of the Nuclear Test done in Chagai and still today people are affected by that test. It shows how much risk it is and how much people are in fear of living in this Nuclear power world.
