Has employment increased or decreased in cyber age?

	Thesis	Antithesis	Synthesis
1-	Technology reduced human interaction in mechanical and technical jobs.	Latest technologies relies on human intervention to function properly.	Self-aware AI has independent intelligence and does not human
2-	Automation of jobs removed human labor.	Automation doesn't destroy jobs, but transforms it.	Automation machines are able to perform jobs more accurately and efficiently than human.
3-	Skill mismatch decreased employment	Skill mismatch can be about using regular skills training	AI machines do not need training to adopt to new skills.
4-	24 hours availability of machines also reduced the employment.	machine does require constant maintenance and changes.	AI machines do not sleep, take break or changes.
5-	Online banking replacing bank tellers.	Bank branches are still hiring tellers for Bank inside operations.	AI and Automation have streamlined these operations and reduced bank tellers
