Topic : Has employment increased or decreased in cyber age.

Attention  
grabber

When a student gets scolded in the class for bad performance it depends on him to become more determined to get good grades or become stubborn. Similarly as the technology is enhancing it depends on individual to learn technical skill or blame the cyber age for having no job.

Thesis  
Statement

The rate of employment has increased in certain sector in cyber age however there is a debate it is responsible for producing more unemployment. Cyber age has enhanced high skilled jobs, by learning technical skills the rate of unemployed can be minimized.

Reflecting  
outlines

Cyber age has increased employment by hiring skilled <sup>individuals</sup> individuals; online jobs, and by providing online jobs to them. Moreover the emergence of technical skill, increased in entrepreneurship and technical use of heavy machinery is production of cyber age. Contrarily the opponent of cyber age emphasize that it has removed manual labour, machines have replaced human, plus the online hiring ~~has~~ are making people jobless and low skill jobs are discouraged. To start business individual left their jobs which is also responsible for decrease in employment.

Reflecting  
outline

Although, it seems that there is a decrease  
in employment but it ~~is~~ <sup>also</sup> has created more  
job opportunities so we can say it is a  
hard ~~step~~ <sup>time</sup> which has produced a greater  
good

## crunch paragraph

How cyber age has increased or decreased rate of employment

Cyber age has effected the world by both increasing and decreasing the rates of employment. On ~~side~~ ~~oneside~~ individuals & individuals thinks that it has enhanced the working opportunities which is independent of boundries by creating online earning Platforms. For instance, Oxford economic study states that despite strict entry ristriction in 2020 and 2021, online travel plateforms were still responsible for 5,000 jobs in Australi (Thomas Hinto, Statista, January 2023). While on the other side cyber age is considered to be responsible for decreasing job opportunities as it is eliminating labour for example introducing advanced machines like ~~like~~ ~~A~~ has replaced manual labour. In this way there is huge wave of unemployment is created due to cyber age.
