TOPIC: Has EMPLOYMENT INCREASED OR DECREASED IN CYBER AGE.

Cyber age has decreased the employment opportunities (Thesis)	* Cyber age has increased the Jobs opportunities (Anti Thesis)	* Despite <sup>Job</sup> increased in some areas, Cyber age disrupt entire job market (Synthesis)
1) The rise of cyber age has displaced millions of people out of job market.	(1) Despite displacing millions, it also has created hundreds and thousand of job in different sectors.	(1) There is no <sup>same</sup> comparison between creating one job after destroying ten jobs.
2) The rise of e-commerce has hit hard on conventional market, resulted in closer of hundreds of business and loss of employment.	(2) The rise of e-commerce has not replaced the conventional market but evolved this market.	(2) Idea of e-commerce has destroyed middle man <del>and</del> and hoarding concept, resulted in destruction of millions of jobs.
3) The expedite of cyber age has made market highly competitive, resulting in closer of small businesses.	(3) Due to highly competitive market, several businesses explored new ventures and maintain <sup>ed</sup> joint ventures, and entrepreneurial skills.	(3) In a highly competitive market, only those survive who <del>has</del> have large market share
4) The remote jobs concept has made the market high polarized resulting in leaving less attractive jobs in corner.	(4) The remote job concept has given skilled workers a right place to work and earned market competitive salary packages.	(4) <del>if all</del> Due to this remote job concept, many countries are facing skilled labour shortages
5) Due to high cost of installing and managing cyber apparatus, information technology has been marginalising already marginalised businesses.	(5) Apart from being costly, it has provided new business opportunities <del>of</del> installation and management businesses.	(5) Apart from establishing new ventures, it has made the market dependent on few suppliers which <del>was</del> resulted in exploitation of available resources.
