

NEGLECT of ENHANCING INTELLECTUAL ABILITY of EDUCATION SYSTEM.

Introduction:

Once the man was searching food, he was tired and sat on tree. He said to Allah, you have promised to give food to everyone who is in need. So, he saw the man, who had food in his hands. But the man sitting on tree remained silent and didn't say anything. So, the man was returning when he didn't see anyone. The man sitting on tree, ~~made~~ coughed, then he got food. Hence, this is the lesson ^{off} not to sit and watch only but try to get by doing.

Connecting
Sentence

Pakistan is also in a situation of seeing only negligence in enhancing the intellectual ability in education system rather to improve the system by doing.

Reflection
of the outline

Due to the negligence in enhancing intellectual ability in education system Pakistan is not developing like other countries. Because of poor financing and unavailability of good staff, this problem occur. Therefore, system has failed to

adopt the modern skills. It has promoted only methods and it lacks in skill-based activities. In this way, system needs to make progress by competition with other institutions. It need to make active learners by providing modern education policies. Hence, Pakistan will get fruitful results by taking important steps like providing trainings on modern education, with participation of people in different activities, giving them quick feedback and employment in writing as well as readings skills with case-study method.

Concluding
Sentence

In a nutshell, the proper education system is necessary for boosting the performance of country. However, by implementing on the policies system can be improved.

Thesis

Statement

Pakistan has shown negligence in enhancing the intellectual ability in education system. This problem has made education system ineffective and weaker. However, the system need effective steps to make education system stronger.
