Globalization And Climate Change are Interrelated:

Introduction:

Attention
Grabber

The Butterfly Effect; a classic idea that suggests that a small action such as flapping of a butterfly's wing in one part of the world, could set off a chain of events that eventually leads to a significant impact elsewhere. Same is the case with Globalization and Climate change as both are interrelated similarly according to Ban Ki-moon, former Secretary-General of the United Nations. "Globalization and climate change are intertwined forces that transcend borders. As the world becomes more interconnected, the impact of climate change remind us that we share a common fate on the Planet". This means that globalization and climate change are interrelated as globalization has enabled nations to pay attention to various products.

Tip Top Classic

Such as energy products. The principal results of these products has a significant influence on climate change. which proves the interconnectedness between globalization and climate change.

List of outline

The process of globalization effects climate change and climate change reciprocates it ~~and~~ simultaneously such as in order to connect and support needs of global world degradation of climate ~~is~~ i.e. deforestation continues. Another aspect of interrelation is that the increasing population of global world does not effects only one or a few nations. but the whole globe. which resultantly increase climate challenges. moreover, globalization affects climate change negatively. Consequently global economy is at the risk of climate change. The alarming feature of this interrelation is ~~that~~ the imbalance between developed and developing nations as to achieve interests of developed nations, future of developing nations is at risk. Regardless of negative aspects of this interrelation the global world is united against climate change through launch of

Joint mechanisms on international levels where developed nations provide full assistance to climate hit specially to developing nations through global funds and many more. Moreover, it becomes easier to keep check and balance on activities and to stress on green energy transformation. The negative aspects of connectedness can be undermined through initiatives taken at global level to counter climate such as initiating global level awareness programs by using international platforms i.e. increasing role of UN and developed nations through strategic planning.

Concluding
Sentence/
Thesis
Statement

Thus, to put it briefly, it can be said that Globalization and climate change are interrelated as both have positive and negative effects on each other. However, need of an hour is collective and collaborative efforts to counter negative aspects of this correlation ~~through~~ ~~which~~ so that climate can be ~~at~~ each

Crunch Paragraphs:

Interconnectedness of Globalization

And Climate Change:

The process of globalization has led the world to an increasing interdependence and integration of states and societies. ~~but the~~ ~~little~~ It has introduced many products to the world. Top of the list is energy products. But the ~~little~~ do they realize that it has significant impacts on climate change. Resulted in climate crisis which can be treated as a product of ~~climate~~ globalization. Climate change, as an issue that creates and is created by a global sense of the world, is bound up in both its analysis and policy proposals with same issues that confront globalization. Which shows ~~the~~ interrelation between climate change and globalization. Both have effects on each other in negative and positive way. ~~The~~ According to Antonio ~~Guterres~~ Guterres, Secretary-General of the UN "The forces of globalization have brought us together, but they have also intensified the impact of climate change. Our actions today will determine

Date _____

The future of our shared Planet". This proves the connectedness between Globalization and climate change another evidence of which is a ~~carbon~~ global CO₂ Carbon emissions which grows around 50% in between 1990 - 2017 largely due to the increased international trade and industrial production. ~~to support global~~ ~~growth~~ and it has a significant effect on climate change as world is witnessing extreme weather events, rising sea levels, resource scarcity and many more.

Topic : Is Commercialization of The Biggest Ill of Media.

Introduction #2

Attention
Crafter:

A man bids 5 rupees on a Parrot, but surprisingly the bid went up and stopped at 200 rupees. The man said that that Parrot costed him 200 rupees, God knows whether he speaks or not. The auction owner informed him that it was Parrot ~~to~~ bidding against him. Same is the case with commercialization of media. In which the whole scenarios are controlled and molded to get desired results. According to Noam Chomsky "those who controls the media, controls the minds of the public". Just like media, Parrot was the one who modifies/ bifurcate the situation and controlled mind of man to act accordingly.

~~Conclusion~~
sentence

Thesis
Statement

~~In a nutshell,~~ Commercialization of
media is considered both an ill
and good in the modern world.
~~Commercialization of~~ However, commercialization
of media is ~~an~~ ill due to
wide range of negative effects it
has on different sectors of country
as well as on mankind. Therefore, all
the claims of supporters are mostly like
making mountain out of molehill.

| Reflection of outline | <p>Ills of an commercialization of media & like; it harms the true spirit of it as facts are molded to get personal benefits. Moreover, media broadcastings are solely based on revenue generation which resolutely undermines the scope of news reports and commentaries. Along with other ill an commercialization of media leads to a polarized politics in nations. Contrarily, the supporters of media commercialization emphasize on goods of it like, freedom of speech leads to more information and awareness and shapes and informed voters. Furthermore, it creates job opportunities and cheap, accessible information sources. However, ^{in a nutshell}</p> |
| Concluding sentence | <p>The ill of media still prevail over the goods of it.</p> |

Date: _____

like ~~a~~ making mountain out of molehill.

Cronch Paragraph: # 2

~~Does~~ Is the rampant commercialization the most substantial drawback of the media

The primary responsibility of media is delivering news to public that is true, fair, honest, accurate, and non-biased and to keep the public updated and informed about the world. While commercialization means the process of managing and running seen something primarily for financial gains. Thus, commercialization of media refers to the process of using media platforms for financial gain, often by generating advertising revenue or selling content or products. In a contemporary world, economic development has a primary objective of every business and individual. A worldwide trend towards commercialization of mass media is apparent. In the printed media it is reflected in a substantial increase in the commercial content of newspapers and magazines. Although commercialization of media has brought many benefits

Date _____

but it has raised concerns and criticism on media industry. Its overcommercialization of media leads to undermines the scope of news. Thus, the impact of commercialization on media is complex and multifaceted, encompassing issues of objectivity, content quality, and diversity. However, it is crucial to acknowledge the striking balance between financial incentives and journalistic integrity remains a key concern.
