

Introduction :

Attention grabber :

The contrasting circumstances of agriculture between the two countries who was separated just a day later than Pakistan. India who propelled itself into the realm of agricultural modernization while Pakistan suffers grave consequences of disparity on distribution of water among the four provinces. Admit the concerns regarding water crisis, the government's attention to build more dams is cool as a cucumber. Pakistan has become the museum of the utilization of traditional agricultural methods in the world.

Outline reflection :

Pakistan is grappling with agricultural crisis that probably 10 years ago no one ever thought of it. The expedient shortage of water has caused a conflict between the provinces of the country. There is rising conflict among the provinces on the distribution of water. Farmer's lack of introduction to modern technology has caused the agricultural production to move at snail's pace. It also has skyrocketed the agricultural imports due to the traditional farming methodology. Unprecedented environment conditions are challenging for farmers because of the change in weather patterns around the globe. The dearth of authorities attention on sale and purchase of low quality nitrogen fertilizers has caused problems like soil degradation and also has contributed to bring down the index of agricultural exports.

Thesis Statement:

There is a rapid increase in the concerns regarding Agriculture in Pakistan. The country is facing extreme challenges like water scarcity, outdated farming practices and inadequate infrastructure.

The government should manage these problems with effective solutions like water management techniques, modernized farming technology, ~~and~~ by doing legislation in the reforms and introducing farming friendly reforms.

Date: _____

Crunch Paragraph:

Pakistan was once considered as Bread basket of Asia, no one at that time could imagine the concerns Pakistan will have to face in the near future. According to the statistical data, there has been decline in agricultural productivity.

The agricultural growth turned out to be 0.85% out of the target which was based on sectoral growth at 3.8%. Some of the major crops have been victim of negative growth like cotton, rice, sugarcane have declined by 17.5%. As the majority of population survives on agriculture for livelihood, the sectoral downturn affects not only farmers but other people as well. The poor performance of agricultural sector has induced a leap in the agricultural imports and have contributed to more dept and problems for the government.
